✦ AI Overview

Here's a breakdown of how to create a stop-motion GIF in Photoshop using a series of photos:

1. Prepare Your Photos

- Gather the sequence of photos that will make up your stop motion animation.
- Ideally, these photos should be taken in rapid succession, perhaps using a tripod to maintain consistency. [🔗](#)

2. Import Photos as Layers

- Open Photoshop.
- Go to **File > Scripts > Load Files into Stack**.
- Click **Browse** and select the photos you want to use. You can hold down **Shift** to select multiple files.
- Click **Open** and then **OK** to import the photos as individual layers into a single document. [🔗](#)

3. Open the Timeline

- Go to **Window > Timeline** to open the Timeline panel. [🔗](#)

dropdown menu.

- Click the "Create Frame Animation" button. [🔗](#)

5. Convert Layers to Frames

- Click the menu icon in the upper right corner of the Timeline panel.
- Select **Make Frames From Layers** to convert each layer into an individual frame. [🔗](#)

6. Adjust Frame Settings

- Use the **Play** button or Spacebar to preview the animation.
- If needed, select **Reverse Frames** from the Timeline menu.
- Adjust the frame duration and set the animation to loop using the options in the Timeline panel. [🔗](#)

7. Export as GIF

- Go to **File > Export > Save for Web (Legacy)**.
- In the Export window, select a GIF preset, set colors to 256, and adjust image size as needed.
- Ensure **Forever** is selected in the Looping Options.
- Click **Save** to export your GIF. [🔗](#)

You have now created your stop-motion GIF in Photoshop. [🔗](#)
